

One arm,  
two monitors,  
outstanding  
ergonomics

# ZGX Monitor Arm

Whether for new applications or as an extension: the ZGX is the perfect extension to the ZG1. With its stable cross bar, the Monitor Arm can easily support two monitors. The monitors can be adjusted easily and, as ever, ensure ergonomics in the workplace. And the concealed cable guide still makes sure your desk remains tidy. The Monitor Arm is available in the designer colours silver-white and black.

Familiar functionality: the arm can even support large monitors (<5 kg, <27") with ease. A practical handle is used to move the monitors into your chosen position and ensures secure positioning wherever you want the monitors. 360° rotation with smart 180° lock feature completes the manoeuvrability package. The ZGX cross bar is easy to mount.
