Product description

The EK-LTV-BL / EK-LTV-XL-BL product is a mechanism designed and built to move a retractable TV. The product in the rest state is placed inside a cabinet-type piece of furniture, where the TV is also concealed; by operating a wired control, the product brings the TV into a working state. The transition between the two states of rest/use takes place via an electric motor integrated in the lifting column.

Models differ according to the length of the lifting column:

- EK-LTV-BL, with a height at rest of 790 mm, suitable for TVs up to 43";
- EK-LTV-XL-BL, with a height at rest of 939 mm, suitable for TVs up to 65".

Package contents

1. 3-stage telescopic lifting column
2. Cabinet wall connection brackets
3. Supporting structure
4. Uprights for TV screen installation
5. Support for fixing upper cover panel
6. Control unit
7. T-splitter
8. Desk Sensor
9. Wired remote control
10. Cavo di interfaccia USB2Lin

Technical specifications

Technical data - General information:

Dimensions in rest position (WxHxD, without TV)	EK-LTV-BL: 471 x 598,5 / 790 x 174,7 mm EK-LTV-XL-BL: 471 x 753,5 / 939 x 171,5 mm
Maximum dimensions (WxHxD, without TV)	EK-LTV-BL: 471 x 1445 x 174.7 mm EK-LTV-XL-BL: 471 x 1945 x 171.5 mm
Mass (without TV)	EK-LTV-BL: 15 kg (33 lb) EK-LTV-XL-BL: 16 kg (35 lb)
Installation dimensions	EK-LTV-BL: 518 / 545 mm EK-LTV-XL-BL: 700 mm
Maximum excursion closed/open position	EK-LTV-BL: 665 mm EK-LTV-XL-BL: 999 mm
Cycle time	18 - 25 s

Environmental operating conditions:

Environment	Closed and dry, domestic
Ambient temperature	5 to 40 °C
Relative humidity	30 to 50 % (without condensation)
Salinity	Excluded
Solar radiation	No
Vibration	No

Environmental conditions of transport and storage:

Environment	Closed and dry
Ambient temperature	-10 to +50 °C
Relative humidity	10 to 80 % (without condensation)
Salinity	Excluded
Solar radiation	No
Vibration	No
Splashes of water and oil, projection of material and substances from nearby machines	No

Power supply:

Voltage	100 - 240 Vac $\pm$ 10%
Frequency	50 - 60 Hz $\pm$ 2%
Stand-by power	0.1 W
Total power output	300 W
Protection required	IP20

Mechanical data of the handling column

Maximum push	EK-LTV-BL: 700 N EK-LTV-XL-BL: 600 N
Bending moment	EK-LTV-BL: My = max. 150 Nm dynamic EK-LTV-XL-BL: My = max. 100 Nm dynamic
Maximum speed	38 mm/s
Work cycle	EK-LTV-BL: 10 % ~ 2 min at continuous use and full load followed by 18 min break EK-LTV-XL-BL: 5 %

Technical data - Television:

Minimum screen size	32"
Maximum screen size	65"
Minimum space between TV and cabinet shelf	13.50 mm
Maximum weight	25 Kg
TV mounting standard	VESA 400, 300, 200, 100 (width in mm) x 400, 300, 200, 100 (height in mm)

Other features:

- Compact design, guide and actuator are perfectly integrated
- Mounted connector for easy connection with control unit and separate motor cable
- Column colour: black RAL 9005
- Silent movement
- PIEZO™: integrated anti-collision sensor minimises the risk of damage in the uphill and downhill directions
- PVC-Free™, made without PVC materials
- Invisible slide rails
- Minimum distance between profiles
- Synchronised movement of the medium profile
- Fixing bracket for wired control
- Motor housing (black) pre-mounted in the handling column
- Approval according to EN 60335-1 and UL 962
- For push applications only

Wiring

⚠ DANGER

The modes of operation described below are reserved exclusively for trained and authorised personnel when installing the product.

⚠ CAUTION

The control unit must only be connected to the voltage indicated on the label

1. Connect the first DL/DB (connector) to socket 1 next to port A2 on the control unit using the 6-pin plug (RJ45 type) on the motor cable. Channel 1 is the channel closest to the control port.
2. Connect additional DL/DB to sockets 2, 3 and 4 in sequence.
3. Connect the wired remote control to control port A1 or control port A2.
4. Check that the voltage indicated on the label corresponds to the mains voltage. Otherwise, do not connect the power cable.
5. Connect the power cable
6. Switch on the power supply.

Positioning and fixing

⚠ WARNING

The cabinet structure inside which the device is to be installed must be closed at the sides and have the characteristics shown below in the drawings.

Set the mechanism to the fully open position, following the instructions for connecting the control unit and remote control, as stated in the Instruction manual enclosed with the product.

Next, insert the supporting structure into the cabinet and position the mechanism correctly, in relation to the side dimensions and distance from the wall.

Adjust the device fixing brackets and fix them to the rear wall as illustrated.

Proceed with fixing the mechanism to the floor and wall, using the screws supplied.
